

Reactiv SUITE

**Presentations Re-Imagined.
Teamwork Enabled.
Anywhere.**

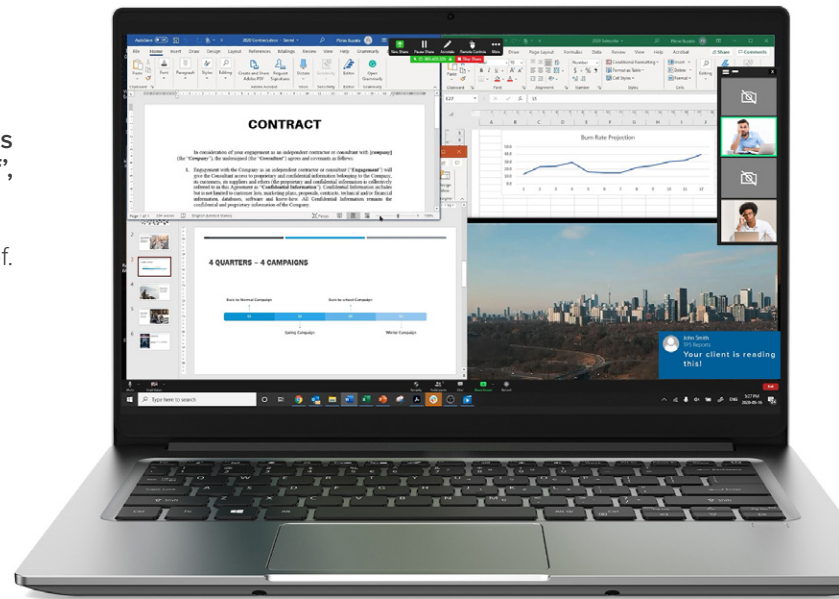

Reactiv SUITE is a digital workspace where multimedia content can be displayed, organized, manipulated, and annotated on a digital surface as easily and naturally as paper. You can present multiple pieces of content and seamlessly capture feedback without the extra clicks and micro-frustrations of traditional screen sharing tools.

REMOTE MEETINGS ARE EXHAUSTING

Today's remote meetings consist of linear slides and endless note-taking that limits our ability to drill down to the 'what-if', 'so-what' and the 'why' of your story.

- Slide presentations are dull, linear and hard to break out of.
- It's challenging and cumbersome to navigate between different types of content.
- Expressing new ideas or capturing feedback is difficult.
- Notes are not illustrative and hard to share.

THE NEXT-GEN SOLUTION

Reactivi SUITE is a SaaS ecosystem of applications that integrates everything needed for compelling presentations and collaborative, productive meetings into a single platform.

- ▶ **Turns meetings into action** - Dynamically interact and present using any type of file, document or media during your meeting and visually capture and share your participants' feedback.
- ▶ **Convert passive audiences to active participants** - Reactivi will let you engage in non-linear presentations, where your audience can ask 'what-if?', 'so-what?' and 'why?.'
- ▶ **Be at the center of your presentations** - Unlike typical remote screen sharing sessions, where you are forced to be a tiny thumbnail, lost on a cluttered desktop, Reactivi SUITE allows you and your content to be front and center.
- ▶ **IT compliant** - Work within your existing IT infrastructure, user and data policies. Save digital content exactly where you want, on-prem or cloud.

Tell Your Story

Elevate your presentations and become a powerful storyteller. Imagine a **'Digital Table'** on which you can present any combination of content - like pictures, decks, documents, videos, websites - in order to articulate your ideas.

Content can be displayed, organized, manipulated and annotated easily and independent of its file format.

Dramatically improves the speed and the accuracy of capturing audience feedback and meeting results.

Reactiv | STAGE

Illustrate Your Ideas

Convert your passive audiences into active participants and contributors who can ideate on an infinite canvas. Imagine a **'Digital Wall'** on which all participants can have their voice, ideas and opinions captured.

Content can be 'pinned' where pages can be ripped out, arranged and inked upon. At the end of the meeting, organize and paginate your work and share effortlessly with everyone.

Simplifies complex ideas, visually communicates concepts and intent, and allows teams to capture decisions and reduce mistakes.

Reactiv | STAGE

TELL YOUR STORY

Reactiv STAGE is a powerful non-linear storytelling tool that enables teams to shift focus from managing content to the narrative of a presentation. STAGE allows you to open, render, markup, and present content in any format that you routinely use.

Dramatically improves the speed and the accuracy of capturing audience feedback and meeting results.

Save 45% of your time in meetings

And get your message through

Open Any File

Open, display and manipulate PDF, URL, DOCX, PPTX, XLSX, all video and picture files.

Arrange & Compare

Easily arrange and compare any number of documents, files, and videos side by side instantly.

Markup and Native Inking

Insert ink natively into many common files, including Office documents.

Enhanced Video Playback

Open any video, resize it, zoom in or out, and manage playback instantly. Even annotate on the video and save scenes with the timestamp.

Revision Management

Automatically tracks date/time and generates new document revisions.

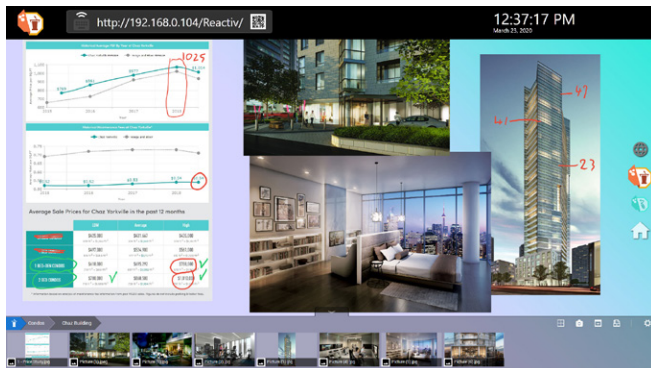

Manage Additional Displays

Cast content on up to three additional displays.

TAILORED TO THE WAY YOU WORK

Reactiv STAGE is so simple that your team doesn't need training, so powerful it handles your demanding presentation needs. No matter what work you do.

SALES

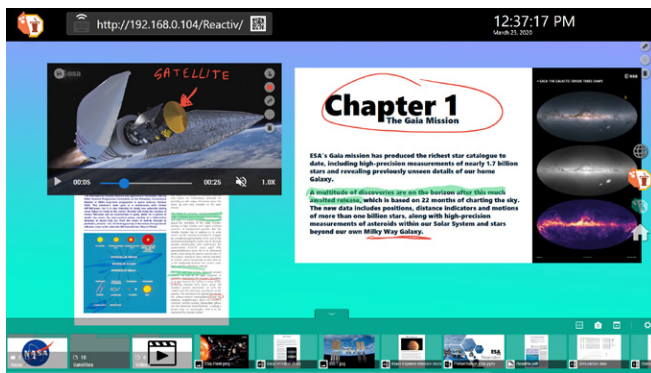

Get a deeper understanding of your customer's needs, seamlessly present your products and get your message through.

CORPORATE

Presents and communicate to a large audience using a podium or in a boardroom, from a broadcast to a sermon.

EDUCATION

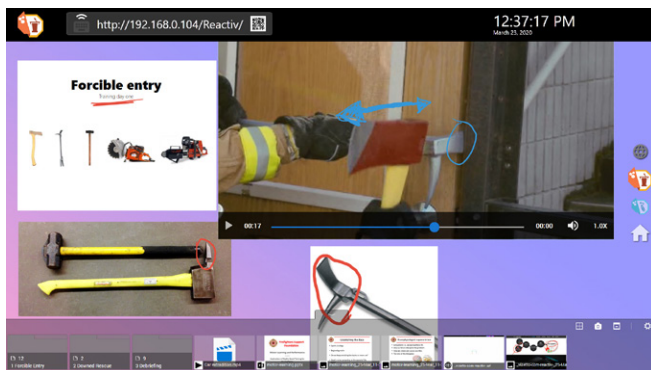

Share any type of content with your class, easily explain complex processes efficiently, and don't waste time.

DESIGN

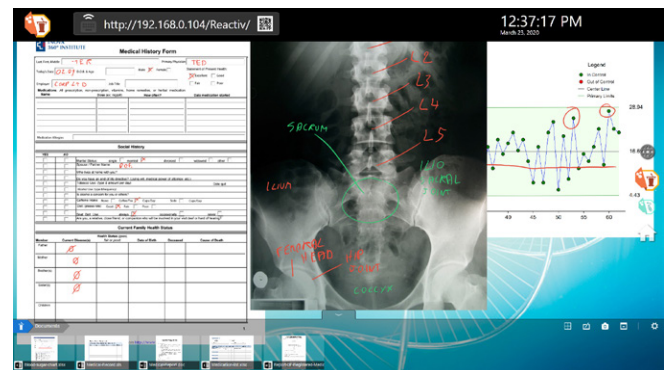

Easily present and compare your media, annotate them, no additional software, no training, and no particular skills needed.

TRAINING

Compile and present all your digital files and content seamlessly, remove distractions and let your students focus.

MEDICAL

Compare pictures, video, documents, annotate them, keep track of changes and evolution, from your tablet, laptop, or Interactive Whiteboard.

Reactiv | SCRIBBLE

ILLUSTRATE YOUR IDEAS

Reactiv SCRIBBLE is a breakthrough brainstorming and layout tool, that uses an infinite canvas, allowing you to sketch, write ideas, mark up pages and create dynamic layouts that accurately represent your vision.

SCRIBBLE simplifies complex ideas, visually communicates vision and intent, and allows your team to capture decisions and reduce mistakes.

Save 45% of your time in meetings

And get your message through

Infinite Canvas

Documents, pictures, videos and a myriad of files can be placed on an infinite canvas and layered with natural writing. Document your ideas and vision without boundaries.

Multi Stylus Support

Multiple users can annotate and contribute simultaneously.

Powerful Pagination

Paginate any section of content and export to PDF instantly.

Smart Insert

Insert space vertically or horizontally and move content for better layout.

Smart Rip

Rip out pages from documents or scenes from videos and create a layout.

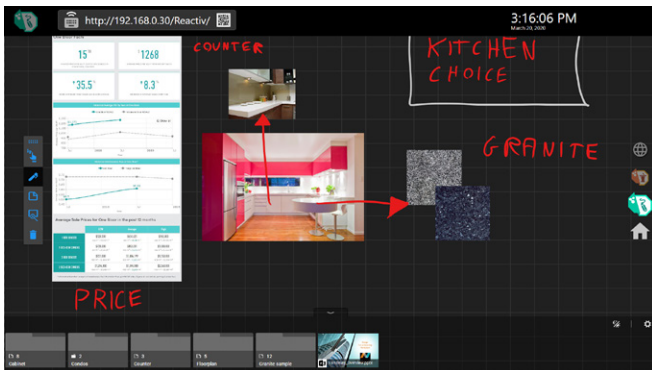

Work with Any File

Open, display and manipulate PDF, DOCX, PPTX, XLSX, all video and picture files.

TAILORED TO THE WAY YOU WORK

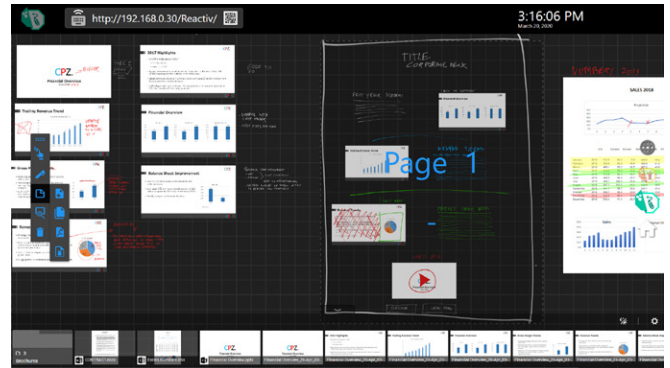

Reactiv SCRIBBLE is so simple that your team doesn't need training, so powerful it handles your demanding brainstorming needs. No matter what work you do.

SALES

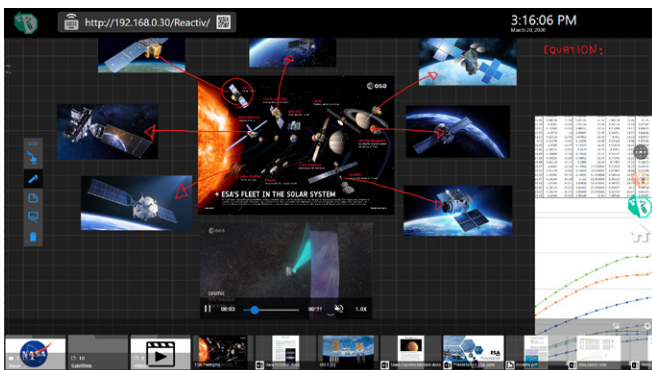

Brainstorm with a customer, capture feedback and share meeting notes.

CORPORATE
